

CRITICAL COMMUNICATIONS WORLD 2024

INVITATION LETTER

📍 DUBAI WORLD TRADE CENTRE, UAE
🕒 14-16 MAY 2024 🏠 Hytera Booth J10

Dear Sir or Madam,

It is with great pleasure for us to invite you to attend the CCW 2024 at Dubai World Trade Centre, UAE, 14th-16th May 2024, where you can experience the latest technologies and products of mission and business-critical communications.

Hytera keeps delivering innovations and user-centric critical communication products for professional users. At Hytera stand #J10, you will find the most complete portfolio, probably in the world, of Intrinsically Safe (IS) two-way radios and smartphones; no matter whether your infrastructure is TETRA, DMR, or cellular, you will find the right device to ensure safe and efficient operations in potentially explosive and combustible scenarios.

Following the trend of transparent law enforcement across countries, Hytera has been successful in empowering officers with an evolving Body Worn Camera (BWC) series. This time we will introduce the latest version of Digital Evidence Management (DEM) system, which is engineered to store, manage, and analyze forensics recordings, including pictures, voice, and video, more efficiently and safely.

Be there, and be updated with the latest evolution of Mission Critical Services (MCS). Hytera team will be happy to walk you through our cutting-edge MCS Convergence-native Solution, meticulously aligned with 3GPP mission-critical standards. Encompassing MCPTT, MCVideo, and MCDATA, this solution facilitates critical voice and extends the use of broadband networks for enhanced bandwidth and high-speed data applications in all kinds of industrial scenarios.

We will also bring Hytera Emergency Response Communication Solutions to the show floor and demonstrate how our products can be a great helper to PPDR personnel during their mission of disaster relief and emergency response.

Eagerly anticipating your visit at CCW2024, we are excited to have the opportunity to exchange insights with you. Our unwavering dedication to addressing the communication challenges faced by industrial users has propelled Hytera to the forefront of technological innovation and value.

Hytera Communications Corporation Limited
