

Unleashing the Power of Convergence-native Communication

Hytera at MWC Shanghai 2023

28-30 June · SNIEC
N1.E120

INVITATION

Dear Ms./Mr.

We cordially invite you to attend the MWC (Mobile World Congress) Shanghai 2023, hosted by GSMA, where we can explore the breakthrough and future of the professional communication industry with operators and partners worldwide.

As a leading player in the professional communication industry, Hytera has always embraced an ethos of open collaboration and co-creation. Hytera has been dedicated to technological innovation and value creation in this field, achieving numerous significant accomplishments and milestones over thirty years.

Cutting-edge technologies such as 5G, AI, and the IoT, propelling the professional communication industry towards broadbandization, intelligence, and application acceleration. Through our shared exploration and cooperation, we can unlock the potential of these technologies and shape a brighter future for the industry.

At MWC, Hytera will show the convergence-native solutions, including professional smart terminals, smartphones, and 4G/5G system products. Also, Hytera will demonstrate how the solutions enable six vertical industries to facilitate efficiency.

We eagerly anticipate engaging in in-depth discussions and collaborations with global operators and partners like you, and collectively building an industry ecosystem that opens up broader market space and business opportunities for industry users.

Please accept our most sincere invitation, and we look forward to welcoming you to our booth during the exhibition.

Hytera Communications Corporation Limited
